

Information Security Diagnostic Assessment

Measure your employees' knowledge of information security and create a tailored program of microlearning courses

Course Overview

This online training course is designed to test learner's knowledge on key topic areas of information security principles and best practice.

An AI-powered assessment, it measures the learner's understanding of the topic and offers follow up microlearning training designed to fill gaps in knowledge. Available as xAPI courses on Astute LXP, the Diagnostic Assessment utilises the auto enrol functionality of Astute's powerful AI engine.

A unique, innovative solution, the Diagnostic Assessment is ideal for evaluating individual training needs for each employee and saving time on unnecessary training.

Key Learning Points

- What are the physical and digital risks to information?
- Why is it important to secure mobile and storage devices?
- How to prevent phishing attacks?
- What is social engineering?
- How to use email and the Internet securely?
- What are the consequences of information leaks and cybercrime?
