

## Social Media Challenge

Keep your employees safe on social media with our interactive video challenge

### Course Overview

Combining immersive eLearning with interactivity and gamification, the Using Social Media Challenge is designed to be as engaging as it is informative. Throughout the course, learners follow 'John' as he leads a sophisticated team of cyber-criminals determined to use social media to compromise the personal data of 'Jane' and her colleagues.

Faced with hacking attempts like Phishing scams, Spyware, viruses, and cloning, learners are challenged to thwart John's criminal efforts and must decide the right course of action to win all six security shields and avoid a cyber-attack.

This engaging, interactive course challenges the learner to make the right choices for themselves and their employers when using social media. Unfortunately, there are criminals willing to exploit any accidental slip, so it's important employees are alert and aware of the dangers.

### Key Learning Points

- How to keep your social media accounts secure
- The dangers of connecting with people you don't know online
- Spotting fraudulent messages
- The consequences of leaking data on social media
- How inappropriate social media usage can damage individuals and businesses
