

Legionella and Water Safety

Our online Legionella and Water Safety course explores the danger of exposure to Legionella and lead in water

Course Overview

Water safety is one of the most important aspects of workplace health and safety.

Our Legionella and Water Safety course explores the characteristics of Legionella and raises awareness about how the disease is caught and transmitted, particularly in working environments.

It explores in detail what your employer's legal responsibilities are when it comes to controlling the Legionella bacteria and offers advice on how to achieve water safety in the workplace, including monitoring lead levels in water systems.

Key Learning Points

- What Legionella is
- Why it is important to protect employees from Legionella
- What Legionnaires' disease is
- The importance of providing safe water systems
- The dangers of lead in water
