

Using Big Data Ethically

Train your employees and ensure ethical use of big data at your organisation

Course Overview

This online training course on big data enables organisations to empower their employees on using big data ethically, obeying the principles of transparency, respecting the law, ensuring fairness and protecting data integrity. Overall, the course outlines the three elements that contribute to the amount of data gathered by the Internet of Things (IoT); Volume, variety, and velocity.

This course is set in our Take 5 microlearning format and contains a single module. Learners will look at what is meant by big data and what are the implications for organisations to use big data ethically. The course is designed to raise awareness and enable learners to become aware of the risks and the steps to take to use big data ethically.

Key Learning Points

- Ways we can define and think of big data
- Why we should be aware of our use of big data
- Putting measures in place to protect any data used
- Respecting data privacy and data security laws
- Questions to ask before using big data
