

## Using Email and the Internet Securely

Train employees on using email and the Internet securely to protect your organisation online

## Course Overview

This online training course on email and internet security demonstrates the risks facing organisations when using email and the Internet for the communications and delivery of their products and services. The course is designed to raise awareness amongst employees and covers some helpful tips on the do's and don'ts while using email and the Internet at work.

Set in a gamified format, taking on the role of the office manager at Forever Homes, a fictitious estate agent. Learners will take responsibility for managing enquiry emails, company social media accounts and communicating with clients. Along the way, learn how to use email and internet safely to avoid information security threats.

## Key Learning Points

- Learn how to detect spam and other fraudulent emails and activity
- Understand how technology is changing and its effects on the digital world
- Understand the various risks associated with activity on social media
- Protect yourself from cyber attacks
- Understand how to use the internet safely
