

Working at Height Training (Advanced)

Our Working at Height Advanced course explores how to safely conduct work at height, including the selection and inspection of the correct equipment

Course Overview

Working at height carries a high risk of accident and injuries. Whether you work with MEWPs, scaffolds or ladders, you rely on the effective inspection and maintenance of equipment to stay safe at work.

Building on our Working at Height Essentials course, Working at Height Advanced provides an in-depth explanation of how to plan and carry out work at height.

Key Learning Points

- The importance of the Work at Height Regulations 2005
- How to select the right equipment for a working at height task
- The different types of equipment for working at height
- How to inspect and prepare your equipment
- Ground level working at height
