Environmental Awareness

Our online Environmental Awareness course helps businesses understand the effects of their activities on the environment and how to improve sustainability.

Course Overview

There are many things that individuals and organisations can do to protect the environment. With increasing awareness of the effects of human activity on the environment, there has never been a more important time for businesses to consider their carbon footprints, waste disposal techniques, sustainability and energy efficiency.

Our Environmental Awareness eLearning course is a practical guide for organisations looking to reduce their carbon footprint and promote sustainability. It empowers them to make environmentally sound choices about working practices.

Environmental Awareness is available in two versions: UK and global.

Key Learning Points

- The importance of environmental protection
- Your business’ environmental impact
- Practical techniques for reducing your carbon footprint
- The Reduce, Reuse, Recycle method of waste reduction
- The key pieces of environmental legislation
