

Hand Arm Vibration

An online Hand Arm Vibration course designed to raise awareness of the dangers of exposure to vibrating tools and the effects this can have on an employee's health

Course Overview

Meet Charlotte and Tony. Charlotte uses sanding tools and oscillating saws to produce prosthetic limbs. Tony works on demolition sites using concrete breakers and scabblers. Their jobs are very different but they have one thing in common: hand arm vibration.

Millions of us are at risk of developing Hand Arm Vibration Syndrome (HAVS) or other health complications from exposure to vibrating tools. Our Hand Arm Vibration eLearning course explores the dangers of exposure to vibration at work and what can be done to avoid health issues.

Key Learning Points

- What hand arm vibration is and why it can be dangerous
- The symptoms and effects of Hand Arm Vibration Syndrome (HAVS)
- When and how to conduct a risk assessment
- When health surveillance is appropriate
- The range of control measures available to handle risks
