Information Security Essentials

Enable staff to counter cyber security threats and protect sensitive information.

Course Overview

With so much important information now held in digital form, information security has become an issue that no organisation can afford to ignore. The scale of the threat can't be overstated: in a recent survey, more than 90% of organisations said that they'd suffered some form of cyber security incident in the previous year.

This is where our Information Security Essentials eLearning course can help. It's been designed to provide your staff with an understanding of the main cyber security threats and the practical things they can do to counter them. By taking this course learners can help to ensure everyone in your organisation know how to protect the confidentiality, integrity and availability of the information they work with.

Key Learning Points

- Understand what Information Security is.
- Learn the three core principles of Information Security.
- Learn and understand the three main forms of threat to Information Security.
- Understand how to comply with IT and security policies.
- Understand practical steps staff can take to protect against Information Security.
