

Introduction to Personal Data Protection

Introduce your employees to personal data protection and its importance for your business

Course Overview

This introductory eLearning course on data protection introduces the learner to data protection legislation and the importance of protecting the personal data held and processed by your organisation.

It reflects on the types of data organisations hold about individuals, the responsibilities organisations have towards the individuals whose personal data they hold. The course explores the best practices to follow which will help your organisation gain customer trust and stay on the right side of compliance.

This course was previously called 'Introduction to GDPR' course.

Key Learning Points

- What the various categories of personal data are
- An individual's rights are under data protection regulation
- What the importance of protecting hard-copy and electronic data is
- Seven data protection principles and what do they mean
- What can be learnt from real-life examples of data breaches
